

# CAREERS IN SCIENCE

# *Meteorology*

**Directions:** use the AMS: All About Careers in Meteorology to answer the following short answer questions. Answers should be 5-7 sentences and include both information from the website as well as your own ideas.

1. Define meteorology, discuss the first civilization to study patterns of weather, and why that was important to their lifestyle.

2. Discuss a modern-day meteorologist. Include specifics such as educational background, where one might work, and what one's job description might look like. Would you be a good meteorologist? Why or why not?
